Bibliography of Phasmida (Insecta) - VIII. Supplement I (1930-1984)¹

ULF CARLBERG²

Abstract

The literature on the stick- and leaf-insects (order Phasmida) published during the period 1930-1984, which previously has been missed, has now been listed. A total of 109 scientific papers, chapters in books, theses, reports etc. are listed. A systematic index is included.

Zusammenfassung

Es wird die zwischen 1930-1984 erschienene Literatur der Phasmen erfaßt. Die Bibliographie enthält 109 wissenschaftliche Arbeiten beziehungsweise Kapitel aus Büchern, Thesen, Berichten etc. Ein systematischer Index schließt sich an.

Introduction

While reviewing the literature on the stick- and leaf-insects (order Phasmida) for the period 1930-1984 some 1500 references were found. Previous parts have appeared in Spixiana 6(1983): 27-43; 10(1987): 147-156, and in Beitr. Ent. 35(1985): 3-12; 36(1986): 255-260; 37(1987): 197-207; 38(1988): 277-287. However it soon become evident that those lists suffered from a slight incompleteness. I have now therefore decided to publish a first supplementary part of previous not included references. This part includes 109 references for that period of time.

Acknowledgements. I am most grateful to individuals and librarians for help in obtaining literature. I am particular grateful to Mr. K. D'HULSTER (Belgium), and Mr. P. BROCK and Mr. P. BRAGG (both from England) for special valuable assistance with literature. Economic support to the Phasmida project has kindly been obtained from the HELGE AX:SON JOHNSON's foundation (Stockholm), the Royal Swedish Academy of Sciences (the HIERTA-RETIUS' foundation) and the Entomological Society of Helsinki (Finland).
